Journal of Electron Spectroscopy and Related Phenomena, 68 (1994) vii–xi
Elsevier Science B.V. Amsterdam

CONTENTS

ICES 5 — Proceedings of the Fifth International Conference on Electron Spectroscopy, Institute of Theoretical Physics, Kiev, Ukraine, 25 July to 1 August 1993

Foreword ... xiii

Committees ... xiv

Participants ... xv

Photoelectron Diffraction — Surface Structure

Holographic interpretation of photoelectron diffraction*
J. Osterwalder, R. Fasel, A. Stuck, P. Aebi and L. Schlapbach (Fribourg, Switzerland) ... 1

Photoelectron diffraction and holography: present status and future prospects*
C.S. Fadley, S. Thevuthasan (Davis, CA, USA), A.P. Kaduwela, C. Westphal (Berkeley, CA, USA), Y.J. Kim (Honolulu, HI, USA), R. Ynzunza, P. Len, E. Tober, F. Zhang, Z. Wang, S. Ruebush, A. Budge (Davis, CA, USA) and M.A. van Hove (Berkeley, CA, USA) ... 19

Toward a surface photoelectron diffractometer: a progress report on selected advances and an assessment*
D.A. Shirley (University Park, PA, USA), Y. Zheng, B.L. Petersen, Z. Hussain, W.A. Huff (Berkeley, CA, USA), J.J. Barton (Yorktown Heights, NY, USA) and L.J. Terminello (Livermore, CA, USA) ... 49

Factors which determine the populations of the magnetic quantum number in Auger electron diffraction
D.E. Ramaker, H. Yang and Y.U. Idzerda (Washington, DC, USA) ... 63

Electronic Structure of Solids

Inverse combined with direct photoemission: momentum resolved electronic structure of 2D systems*
M. Skibowski and L. Kipp (Kiel, Germany) ... 77

Photoemission investigation of Fermi surface instabilities in low-dimensional metals
M. Grioni, B. Dardel, D. Malterre, P. Weibel and Y. Baer (Neuchâtel, Switzerland) ... 97

Calculated 2D Fermi surfaces and electronic structure of W(100) and W(110)
V.T. Cherepin, V.M. Floka, S.V. Man'kovsky, A.A. Ostroukhov and V.N. Tomilenko (Kiev, Ukraine) ... 105

Fermi-liquid-type spectral function and angle resolved photoelectron spectra of the $Ti3d_{z}2$ band of $TiTe_2$
S. Harm, R. Dürig, R. Manzke, M. Skibowski (Kiel, Germany), R. Claessen (Saarbrücken, Germany) and J.W. Allen (Ann Arbor, MI, USA) ... 111

Scaling behavior in photoelectron spectra of Ce- and Yb-based heavy fermions*
Y. Baer, D. Malterre, M. Grioni, P. Weibel and B. Dardel (Neuchâtel, Switzerland) ... 121

Auger spectroscopy and the electronic structure of crystals*
P. Weightman (Liverpool, UK) ... 127

Photoionisation cross-section as a probe of 4d hybridisation in dilute Ag alloys
R.J. Cole, P. Weightman (Liverpool, UK), D.R. Jennison and E.B. Stechel (Albuquerque, NM, USA) ... 139

Noble metal Auger spectroscopy as a probe of electronic structure: mapping Fermi energies in trimetallic alloys
R. Landers, S.G.C. de Castro and G.G. Kleiman (São Paulo, Brazil) ... 145

Excited particles emission under electron bombardment of metal surfaces covered by alkaline films
S.F. Belykh, Ju.N. Lysenko, U.Kh. Rasulev and V.Kh. Ferleger (Tashkent, Uzbekistan) ... 151

Theoretical study of ultraviolet photoemission spectra of noble metals
E.E. Krasovskii, A.N. Yaresko and V.N. Antonov (Kiev, Ukraine) ... 157

Non-muffin-tin atomic scattering-matrices for semiconductor LEED calculations
J.-V. Peetz and W. Schattke (Kiel, Germany) ... 167

The electronic structure of $In_xGa_{1-x}As(001)$ $d(2 \times 4)$ surfaces
R. Schnurpfeil, K. Reshöft, A. Müller (Kiel, Germany), Á. Nemcsics (Budapest, Hungary), R. Manzke and M. Skibowski (Kiel, Germany) ... 175

Prediction and observation of II–VI/$CuInSe_2$ heterojunction band offsets
A.J. Nelson, D.W. Niles, C.R. Schwerdtfeger, S.-H. Wei, A. Zunger (Golden, CO, USA) and H. Höchst (Stoughton, WI, USA) 185

*Invited paper.

The influence of anion environment on the band structure of cluster $[CsCl_n]^{n-1}$
S.V. Syrotyuk, S.M. Pidzyrailo, A.S. Voloshinovskii and V.B. Mikhailik (Lviv, Ukraine) 195
Study of the electronic structure of molybdenum and tungsten trisulfides and their lithium intercalates by X-ray electron and X-ray emission and adsorption spectroscopy
G.F. Khudorozhko, I.P. Asanov, L.N. Mazalov, E.A. Kravtsova, G.K. Parygina, V.E. Fedorov and Ju.V. Mironov (Novosibirsk, Russian Federation) 199
Interrelation between π- and σ-electrons of valence band in carbon condensats
B. Andriyevsky, M. Romanjuk and V. Kurliak (Lviv, Ukraine) 211
Electronic structure of nonstoichiometric transition metal carbides: a comparison of theory with XPS, EELS and XANES spectra
I.Ya. Nikiforov, O.V. Kolpacheva, I.V. Bazhin (Rostov-on-Don, Russian Federation) and A.B. Kolpachev (Taganrog, Russian Federation) 215
The effects of vibrational relaxation on oxygen K-emission spectra short-wave structure of chelate complexes
O.L. Shcheka and V.I. Vovna (Vladivostok, Russian Federation) 223

Atomic and Molecular Photoemission and Auger Processes

High resolution photoelectron studies of atomic and molecular photoionisation using synchrotron radiation*
J.B. West (Warrington, UK) 233
ZEKE spectroscopy of hydrogen-bonded phenol complexes*
O. Dopfer, T.G. Wright and K. Müller-Dethlefs (Garching, Germany) 247
Dependence of the Ar3s and Kr4s photoelectron spectra on the energy of exciting photons exceeding the double-ionization threshold
V.L. Sukhorukov, B.M. Lagutin, I.D. Petrov, S.V. Lavrentiev (Rostov-on-Don, Russian Federation), H. Schmoranzer (Kaiserslautern, Germany) and K.-H. Schartner (Giessen, Germany) 255
Theoretical study of inner shell photoabsorption spectra of simple molecules
V.A. Yavna, A.M. Nadolinsky and V.F. Demekhin (Rostov-on-Don, Russian Federation) 267
Auger decay processes of resonantly excited $3d^{-1}4f$ configuration of xenon-like ions in solids
R. Ruus, A. Kikas, A. Maiste, E. Nõemmiste, A. Saar and M. Elango (Tartu, Estonia) 277
Autoionization phenomena involving the $2p^5 3d$ configuration of argon-like ions in ionic solids
A. Kikas, A. Ausmees, M. Elango, E. Nõemmiste, R. Ruus and A. Saar (Tartu, Estonia) 287
The calculation of molecular Auger spectra*
F. Tarantelli, A. Sgamellotti (Perugia, Italy) and L.S. Cederbaum (Heidelberg, Germany) 297
Estimation of photoemission intensities and the surface photoelectric effect
C.-H. Solterbeck, D. Samuelsen (Kiel, Germany), A. Yang (Hangzhou, People's Republic of China) and W. Schattke (Kiel, Germany) 313
Relaxation energies in XPS and XAES of solid sulfur compounds*
H. Peisert, T. Chassé, P. Streubel, A. Meisel and R. Szargan (Leipzig, Germany) 321
Shake-up satellite structure of transition metal Auger spectra: $L_{2,3}M_{4,5}M_{4,5}$ spectra of the 4d metals
G.G. Kleiman, R. Landers and S.G.C. de Castro (São Paulo, Brazil) 329
Radiative core–valence transitions in wide-gap crystals
A.P. Shpak, O.A. Glike, A.G. Dmitriev (Kiev, Ukraine), P.A. Rodnyi (St. Petersburg, Russian Federation), A.S. Voloshinovskii, and S.M. Pidzyrailo (Lviv, Ukraine) 335
On the energy dependence of the Auger transition probabilities
Yu.N. Kucherenko (Kiev, Ukraine) 339

Adsorption and Surface Reactions

Electronic and geometric structure of adsorbates on oxide surfaces*
D. Cappus, M. Menges, C. Xu, D. Ehrlich, B. Dillmann, C.A. Ventrice, Jr., J. Libuda, M. Bäumer, S. Wohlrab, F. Winklemann, H. Kuhlenbeck and H.-J. Freund (Bochum, Germany) 347
Comparison of an experimental and a theoretical study of the surface alloy Pt/Cu(111)
N.T. Barrett, A. Senhaji, R. Belkhou, C. Guillot (Orsay, France), B. Legrand (Gif-sur-Yvette, France) and G. Tréglia (Marseilles, France) 357
Investigation of the electronic structure reconstruction during various stages of iron oxidation by target current and Auger spectroscopy
E.K. Alidjanov, B.G. Atabaev, K.Yu. Prokhozev and U.Kh. Rasulev (Tashkent, Uzbekistan) 363
Interrelation between atomic and electronic structures of alkaline-earth adlayers on Mo(112) and Re($10\bar{1}0$)
G.A. Katrich, V.V. Klimov and I.N. Yakovkin (Kiev, Ukraine) 369
AES and EELS analysis of the interaction between phosphorus and metallic indium
M. Bouslama, M. Ghamnia (Oran, Algeria), B. Gruzza (Aubière, France), F. Miloua and C. Jardin (Villeurbanne, France) 377

Benzene adsorption on silicon(111) surfaces with different reconstructions: a comparative study by synchrotron radiation photoemission
M.N. Piancastelli, R. Zanoni (Rome, Italy), J.E. Bonnet and K. Hricovini (Orsay, France) 383
The interaction of hydrogen with the InP(100) substrates studied by AES, elastic peak electron spectroscopy (EPES) and EELS
A. Porte, B. Gruzza, C.A. Bondot, L. Bideux (Aubière, France), C. Jardin (Villeurbanne, France) and G. Gergely (Budapest, Hungary) 391
Electronic bandstructure of monolayer Sb on GaP(110)
R. Whittle, E. Dudzik, I.T. McGovern (Dublin, Ireland), A. Hempelmann, C. Nowak, D.R.T. Zahn (Berlin, Germany), A. Cafolla (Cardiff, Wales, UK) and W. Braun (Berlin, Germany) 399
AES and LEED studies of surface stoichiometry of palladium silicide epilayers on Si(111)
A.A. Kuznetsov, S.Yu. Abramova, T.E. Potapova and O.D. Protopopov (Ryazan, Russian Federation) 407
Electron spectroscopy for diagnostics of various solid carbon phases
A.M. Shikin, G.V. Prudnikova and V.K. Adamchuk (St. Petersburg, Russian Federation) 413
Nearly complete tuning of the Fermi level position at a prototypical metal–silicon interface: lead on unpinned Si(111) 1 × 1-H*
V.Yu. Aristov, G. Le Lay (Marseilles, France), K. Hricovini, A. Taleb-Ibrahimi, P. Dumas, R. Gunther, J. Osvald and G. Indlekofer (Orsay, France) 419
Surface intercalation of graphite by lanthanum
G.V. Prudnikova, A.G. Vjatkin, A.V. Ermakov, A.M. Shikin and V.K. Adamchuk (St. Petersburg, Russian Federation) .. 427

Superconducting and Related Materials

X-ray emission spectra and electronic structure of high-T_c superconductors and binary oxides*
L.D. Finkelstein, V.R. Galakhov, V.V. Fedorenko, L.V. Elokhina, A.A. Samokhvalov, E.Z. Kurmaev (Ekaterinburg, Russian Federation), S.M. Butorin, J. Nordgren (Uppsala, Sweden), B.V. Slobodin, Yu.A. Teterrin (Ekaterinburg, Russian Federation) and M.I. Sosulnikov (Moscow, Russian Federation) 431
Electron spectroscopy study of Si/$Bi_2Sr_2CaCu_2O_{8+x}$(001) interface formation
M.V. Gomoyunova, A.K. Grigor'ev, I.I. Pronin and A.E. Rodnyansky (St. Petersburg, Russian Federation) 439
Temperature influence on the energy characteristics of HTS $YBa_2Cu_3O_7$ (Ag) and magnetron sputtered films studied by XPS and XES
E.P. Domashevskaya, V.V. Komarov, V.A. Terekhov and A.V. Shchukarev (Voronezh, Russian Federation) 445
X-ray photoelectron study of Tl–Ba–Ca–Cu–O ceramics
Yu.A. Teterin, M.I. Sosulnikov and L.D. Shustov (Moscow, Russian Federation) 453
Resonant photoemission in $SrCo_{1-x}Fe_xO_{3-\delta}$ perovskites
R. Patel, H. Höechst (Stoughton, WI, USA), G.W. Zajac, S. Pei and J. Faber, Jr. (Naperville, IL, USA) 461
X-ray photoelectron studies of copper and oxygen states in high-T_c superconducting cuprates
Yu.A. Teterin, M.I. Sosulnikov and Yu.A. Petrov (Moscow, Russian Federation) 469
Electron-stimulated effects in HTS single crystalline $Bi_2Sr_2CaCu_2O_{8+x}$
M.V. Gomoyunova, A.K. Grigor'ev, S.V. Moshkin, I.I. Pronin and A.E. Rodnyansky (St. Petersburg, Russian Federation) 479
Electron APS spectra near the Ba3d threshold: comparison between Ba metal and oxide $YBa_2Cu_3O_{7-x}$
M.A. Vasiliev and V.V. Martynyuk (Kiev, Ukraine) 485

Magnetism

Magnetic dichroism in X-ray photoemission*
G. van der Laan (Warrington, UK) 489
Recent results of crossfertilization between electron spectroscopy and magnetism*
H.C. Siegmann (Zürich, Switzerland) 505
Electronic and magnetic structure of rare-earth materials studied by high-resolution photoemission*
E. Weschke, C. Laubschat, A. Höhr, K. Starke, E. Navas, L. Baumgarten, A.V. Fedorov and G. Kaindl (Berlin-Dahlem, Germany) 515
Spectroscopic and magnetic properties of gadolinium Laves-phase compounds
M. Magnitskaya, G. Chekowska, G. Borstel, M. Neumann and H. Ufer (Osnabrück, Germany) 525

Carbon, Organic and Polymer Materials

Penning ionization electron and ultraviolet photoelectron spectroscopies of organic extra-thin films comprising alkyl chains: molecular aggregation, film growth and chemical reaction
H. Ozaki, S. Mori, T. Miyashita, T. Tsuchiya, Y. Mazaki, M. Aoki, S. Masuda, Y. Harada and K. Kobayashi (Tokyo, Japan) 531

Thin polymer films on metal: assessment of a conductivity mechanism via valence band spectra
J.J. Pireaux, Ch. Grégoire (Namur, Belgium), J.A. Gardella, Jr. and P.A. Cornelio (Buffalo, NY, USA) 541
UV photoelectron spectra of Nb and Mo single-crystal surfaces
I. Buribayev and N.A. Nurmatov (Tashkent, Uzbekistan) 547
The electronic structure of crystalline nickel oxides
R.A. Evarestov, V.A. Veryazov, I.I. Tupitsyn and V.V. Afanasiev (St. Petersburg, Russian Federation) 555
Bromination reaction in C=C double bond determination by XPS
V.I. Povstugar, A.M. Lyakhovich and A.A. Shakov (Izhevsk, Russian Federation) 565

Catalysis

XPS of heterogeneous catalysts: structure and reactivity*
C. Furlani (Rome, Italy) 569
XPS study of catalytic compounds $H_2V_{12-x}M_xO_{31-\delta}$ (nH_2O) (where M is Mo, Cr)
M.V. Kuznetsov, V.L. Volkov, G.S. Zhakharova and V.A. Gubanov (Ekaterinburg, Russian Federation) 579
XPS studies of supported tungsten carbide(s)
A. Katrib, F. Hemming, L. Hilaire, P. Wehrer and G. Maire (Strasbourg, France) 589
Auger electron spectroscopic study of binary nickel(II)–iron(III) hydroxides
A.A. Kamnev (Saratov, Russian Federation) and A.A. Smekhnov (Kiev, Ukraine) 597

Aspects of Quantitative Analysis

Effects of elastic and inelastic electron scattering on quantitative surface analyses by AES and XPS*
C.J. Powell (Gaithersburg, MD, USA), A. Jablonski (Warsaw, Poland), S. Tanuma (Saitama, Japan) and D.R. Penn (Gaithersburg, MD, USA) 605
Monte-Carlo simulation of elastic electron reflection from disordered surfaces of Ag, Ba, and Au
A.G. Kochur, V.L. Sukhorukov and S.V. Lavrentiev (Rostov-on-Don, Russian Federation) 617
Elastic electron backscattering spectroscopy*
N.G. Nakhodkin and P.V. Melnik (Kiev, Ukraine) 623
Electron energy-loss line-width for electrons reflected from a non-monocrystalline substance
N. Nakhodkin, A. Voskoboinikov, Yu. Kryn'ko, S. Kulik, P. Melnik and D. Sheka (Kiev, Ukraine) 641
X-ray electron investigation of temperature dependence of chemical bond elements in Fe alloys
N.S. Terebova and I.N. Shabanova (Izhevsk, Russian Federation) 647
Development in Auger depth profiling technique
M. Menyhard, A. Konkol, G. Gergely and A. Barna (Budapest, Hungary) 653
Quantitative Auger analysis of A^3B^5 pseudobinary compounds by means of spectrum synthesis based on a non-linear least-squares fitting technique
B.Ja. Ber, A.N. Raev and D.A. Zushinskiy (St. Petersburg, Russian Federation) 659
XPS method for near surface analysis of Mg in magnesium compounds
V.T. Gritsyna, M.V. Dobrotvorskaya and V.F. Pershin (Kharkov, Ukraine) 669

Practical Materials Analysis

X-ray photoelectron spectroscopy characterisation of third body layers formed during automotive friction braking
A. Wirth (Sheffield, UK), R. Whitaker (Cleakheaton, UK), S. Turner and G. Fixter (Sheffield, UK) 675
X-ray photoelectron study of samples containing reactor fuel from "lava" and products growing on it which formed at Chernobyl NPP due to the accident
Yu.A. Teterin, A.S. Baev and S.A. Bogatov (Moscow, Russian Federation) 685
An AES investigation of high temperature annealing of Ta–Hf and W–Hf alloy surface composition
K.A. Tursunmetov and B.G. Atabayev (Tashkent, Uzbekistan) 695
X-ray photoelectron studies of TiCo surface treated in RF-plasma in H_2 atmosphere
E.V. Chopovskaya, V.Yu. Nosenko and A.L. Pivovarov (Kiev, Ukraine) 699
The AES investigation for Mo–Zr alloy surface composition
A.K. Sabirov and K.A. Tursunmetov (Tashkent, Uzbekistan) 703
XPS and AES study of reactive Ti–Si interface
E. Buzaneva, T. Vdovenkova, S. Litvinenko, V. Makhnjuk, V. Strikha, V. Skryshevesky, P. Shevchuk, V. Nemoshkalenko, A. Senkevich and A. Shpak (Kiev, Ukraine) 707
Electron spectroscopy of the surface of diamond and cubic boron nitride
O.P. Bugaets, A.A. Smekhnov and S.P. Kuzenhov (Kiev, Ukraine) 713

Photoemission study of an In diffusion barrier in ZnSe/InP(100) heterostructures
D. Rioux (Minneapolis, MN, USA) and H. Höchst (Stoughton, WI, USA) 719
XPS study of non-stoichiometry for chalcopyrite crystal
E. Buzaneva, T. Vdovenkova, V. Nemoshkalenko, A. Senkevich, A. Shpak (Kiev, Ukraine), A. Gubanova (Kamemets-Podolskii, Ukraine), T. Takizawa (Tokyo, Japan) and C. Schwab (Strasbourg, France) 727

Instrumentation, Techniques, Methodology

Investigation of metal surfaces by VUV laser based photoemission spectroscopy*
T. Munakata (Wako, Saitama, Japan) and I. Kinoshita (Tokyo, Japan) 731
Synchrotron radiation complex ISI-800
V. Androsov (Kharkov, Ukraine), V. Bar'yakhtar (Kiev, Ukraine), E. Bulyak, A. Gevchuk, V. Chechetenko, A. Dovbnya, S. Efimov, P. Gladkikh, I. Karnaukhov, S. Kononenko, V. Kozin, V. Lihachov, V. Lyaschenko, N. Mocheshnikov (Kharkov, Ukraine), V. Molodkin (Kiev, Ukraine), V. Moskalenko, A. Mytsykov (Kharkov, Ukraine), V. Nemoshkalenko (Kiev, Ukraine), Yu. Popkov, A. Shcherbakov (Kharkov, Ukraine), A. Shpak (Kiev, Ukraine), M. Strelkov, Yu. Telegin, V. Trotsenko and A. Zelinskiy (Kharkov, Ukraine) 747
Au, Ag and Ag/Au samples, studied using elastic peak electron spectroscopy (EPES) and computer simulation
D. Zeze, B. Gruzza (Aubière, France), J.-M. Guglielmacci (Marseilles, France) and C. Jardin (Villeurbanne, France) 757
XPS and STS of layered semiconductor MoS_x
E. Buzaneva, T. Vdovenkova, A. Gorchinsky, A. Senkevich, V. Nemoshkalenko (Kiev, Ukraine), A. Klein and Y. Tomm (Berlin, Germany) 763
The investigation of liquid surfaces by electron spectroscopy
H. Morgner (Witten, Germany) 771
